

# Gluestrip

For taking up carpets and dissolving/removing adhesives, carpets and PVC residues.

**Application:** Devo Gluestrip is a ready-to-use liquid for dissolving and removing adhesives, carpets and PVC residues from wooden floors, (cement) screeds, concrete, stone, tiling, etc.

- The product makes it easy to remove fitted carpets and adhesive residues.
- Safe to use

**Technical note:** the product may react with non-ferrous metals.

**We also invite you to consult the technical sheet for Devo Gluestrip. Before applying the product, the user must test, at his own risk, whether the product is suitable for the relevant surface!**

## Instructions

**Preparing the surface:** if possible, take up the carpet by cutting out and removing strips measuring approx. 50 cm. Remove any dust or grime from the surface.

**Preparing the product:** the product is ready to use.

**Application: if possible,** use a watering can. Apply evenly and liberally. Allow the product to act for 20 minutes to 1 hour. Then remove the loose adhesive paste using a floor scraper. For thicker adhesive layers, repeat this step. If the carpet is difficult to remove, it should first be soaked with Devo Gluestrip. Wear protective gloves. Wait until the floor is dry. Then remove any other residues using a rotating machine fitted with a P24 or P40 sanding disk.

**Application temperature:** 15 - 20 °C

**Consumption:** 3 - 6 m<sup>2</sup>/litre. Depends greatly on the thickness of the layer needing to be removed, the type of material and the surface.

**Clean tools:** with water

**Pot life:** unlimited in the sealed original packaging. Keep away from frost.

# Gluestrip

## Technical properties

### Description (type):

Product for removing adhesive, fitted carpets and PVC residues.

### Base:

Mixture of surfactants, sequestering agents, wetting agents, potassium hydroxide and demineralised water.

### Characteristic properties:

Devo Gluestrip is a powerful alkaline cleaning product, which can dissolve certain adhesives (for fitted carpets). The product may react with non-ferrous metals.

### Application:

Surface:

Removes most types of paint and decorative coverings from virtually all surfaces, such as concrete, natural stone and other mineral surfaces, wood and metal, including light metals and copper.

Material temperature:

15 - 20 °C

Atmospheric humidity:

Not applicable

Material humidity:

Not applicable

Production preparation:

Ready to use

Pot life:

Not applicable

Application:

Using a watering can

Diluent/cleaning product:

Water

Consumption/covering power:

3 - 6 m<sup>2</sup>/litre. Depends greatly on the thickness of the layer needing to be removed, the type of material and the surface.

Layer thickness:

Apply liberally.

Finishing:

After treatment and drying, always sand the surface sufficiently before applying the finish.

### Physical and chemical properties:

Colour(s):

Blue

Odour:

None

Consistency:

Liquid

Viscosity:

4 mPa.s

Specific weight at 20 °C/density:

1.04 kg/litre

Solid matter by weight and/or volume:

-

VOC content:

0 %

Drying at 20 °C/65% RH:

-

Fully hardened after:

Not applicable

Gloss (H. 60°):

Not applicable

pH at 20 °C:

13.2

Solubility:

Fully water soluble

Vapour pressure/20 °C, mBar:

-

Flash point:

Not applicable

Self-combusts at:

Not applicable

Shear strength:

Not applicable

Pot life:

Unlimited in the sealed original packaging, keep away from frost.

### Safety:

**Attention:** causes skin irritations. Causes serious eye irritations. After using this product, wash your hands thoroughly. Wear protective gloves and glasses. IF THE PRODUCT COMES INTO CONTACT WITH THE SKIN: wash thoroughly in water. IF THE PRODUCT COMES INTO CONTACT WITH THE EYES: rinse carefully with water for several minutes; remove contact lenses, if possible; continue to rinse. Specific treatment is required (see instructions). In the event of skin irritations: consult a doctor. In the event of persistent eye irritations: consult a doctor. Remove and wash any contaminated clothing before using it again. Keep out of reach of children. In case it is necessary to consult a doctor, keep the container or label at hand. Safety data sheet available on request.

### Environmental information:

Biodegradable:

The product is not considered harmful to aquatic organisms and has no long-term negative influence on the environment. The surfactant(s) in this preparation meet(s) the biodegradability criteria defined in Regulation (EC) N° 648/2004 on detergents.

Disposal:

This product can be discarded in the concentrations indicated for use, provided it is neutralised. Any restrictions required by local public authorities must always be respected. Any product that is used, including the open material, must be disposed of in the required manner, according to the local regulations.

### Delivery/transport:

Available in the following quantities:

2.5 litres
